### \* READ THIS FIRST \*

Before performing maintenance on vehicle, ensure that all cautions and warnings have been observed to prevent vehicle damage or personal injury. See CAUTIONS & WARNINGS in MAINTENANCE INFORMATION article in this section.

#### Introduction

There are three types of scheduled services articles, depending on how the vehicle is driven. They are light duty, normal duty, & heavy duty. This article is for "Light" duty ONLY.

Verify that this is the correct article to use. Light duty means the vehicle is NOT primarily operated under the following severe conditions:

- \* Towing a trailer or using a camper or car top carrier.
- \* Repeated short trips of less than 5 miles in temperatures below freezing.
- \* Extensive idling or low-speed driving for long distances as in heavy commercial use, such as delivery, taxi, or patrol car.
- \* Operating on rough, muddy, or salt covered roads.
- \* Operating on unpaved or dusty roads.

If the vehicle is operated primarily under any of these severe conditions, the service schedule frequency in this light duty article is INADEQUATE. DO NOT USE THIS ARTICLE. Rather, proceed to:

- \* SCHEDULED SERVICES - HEAVY DUTY SERVICE.

Light duty also means the vehicle is operated under both the following light conditions:

- \* Used for non-commercial work.
- \* Operated for distances greater than five miles in temperature climates above freezing and below 90°F.

If the vehicle does NOT meets both light duty conditions, the service schedule frequency in this light duty article is INADEQUATE. DO NOT USE THIS ARTICLE. Rather, proceed to:

- \* SCHEDULED SERVICES - NORMAL DUTY SERVICE.

## MISCELLANEOUS NOTES

- \* Inspect the Supplemental Restraint System (SRS) airbag every 120 months.
- \* The light service only requires an inspection of the automatic transaxle fluid. The fluid is changed at a regular interval only as part of the severe service.
